Technical Skills

- **Programming & Querying:** Java, Python, SQL (MySQL)
- **Data Analysis:** Pandas, Tableau, Power BI, Excel
- **Machine Learning:** Scikit-Learn, Apriori, K-means Clustering, Decision Trees
- **Systems & Operations:** System Monitoring, Session Management, ITSP Connectivity, Slack API

Experience

US gRDC Systems Operator — Global Tote, Cherry Hill, NJ
May 2025 - Present

- Managed daily system operations, multi-site content loading, session controls, and inter-track connectivity (ITSP links) for Quantum, eBet, G1, and G4 platforms.
- Executed race card processing, manual pool-merging, data synchronization, runner scratches, and official dividend calculations.
- Partnered with racing judges and stewards via Slack for live remote operations while monitoring site performance and coordinating technical QC reviews.
- Resolved inbound customer/technical issues, escalated complex software bugs, and maintained detailed event logs.

Projects

Retail Stores EDA | Python, MySQL, Excel
• Extracted and queried retail datasets using MySQL to analyze performance trends and future planning metrics.
• Cleaned and preprocessed missing/null numerical and categorical data using Excel.
• Performed exploratory data analysis utilizing pivot tables and XLOOKUP to compute key averages, counts, and sums.

Nike Global Sales Dashboard | Tableau, Power BI, Power Query, Excel
• Constructed an interactive visual dashboard utilizing bar graphs and regional metrics in Tableau and Power BI.
• Cleaned and preprocessed complex sales datasets using Power Query and Excel.
• Analyzed yearly performance trends to deliver actionable insights regarding business performance, total revenue, and growth opportunities.

Diabetes Dataset Analysis | Python (Pandas, Scikit-Learn)
• Utilized Pandas to clean and preprocess healthcare datasets, executing outlier removal, missing data imputation, and sampling.
• Implemented data mining and machine learning models including Apriori association rules, K-Means Clustering, and Decision Trees.
• Interpreted classification patterns and association rules to address clinical research questions regarding diabetes risk factors.

Education

Stockton University — Galloway, NJ
Bachelor of Science in Computer Science | GPA 3.99/4.00 (Summa Cum Laude) — May 2025
